Level 1 — Easy divisors (E) — Number

✓ Submitted

Problem: Write a program to check whether two numbers are friendly pairs. (Two numbers are friendly pairs if the sum of proper divisors of the first number is equal to the second number and vice versa.)

Sample Input:

Enter two numbers: 220 284

Sample Output:

220 and 284 are friendly pairs

Test Cases:

===TEST CASE 1===

Input:

Enter two numbers: 220 284

Expected Output:

220 and 284 are friendly pairs

===TEST CASE 2===

Input:

Enter two numbers: 220 284

Expected Output:

220 and 284 are friendly pairs

Your Code

```
1 #include <stdio.h>
2
3 int sumofdivisors(int n)
4 {
5     int sum = 0;
```

Output

```
Enter two numbers: 220 and 284 are friendly
pairs
```

QUESTIONS

Q1

Scenario Based - Smart Waste Recycling Plant System
25 marks

Q2

Scenario Based - IT Company Project Performance Evaluation (2025–2026).
25 marks

Q3

Scenario Based - 3. Semiconductor Chip Manufacturing System
25 marks

Q4

Scenario Based - 4. Cloud Storage Subscription Management (2026)
25 marks

4/4 answered

Q1 Scenario Based - Smart Waste Recycling Plant System

25 marks

A recycling plant processes 5,000 kg of waste every day.

Waste Categories:

Plastic

Paper

Metal

Electronic Waste

Efficiency Levels:

≥90% Recycled → Excellent

75–89% → Good

50–74% → Average

Below 50% → Poor

(a) Develop a C program using arithmetic operators to calculate recycled waste percentage and remaining waste. Use decision-making statements to determine plant efficiency.

(b) Use looping constructs to process waste data for 30 days. Use continue to skip maintenance days and break if the processing machine fails.

Your Code

```
1 #include <stdio.h>
2
3 int main()
4 {
5     float plastic, paper, metal, eWaste;
6     float recycled, remaining, percentage;
7
8     printf("Enter plastic recycled: ");
9     scanf("%f", &plastic);
10
11     printf("Enter paper recycled: ");
12     scanf("%f", &paper);
```

Input

Enter plastic recycled: 1200
Enter paper recycled: 1000
Enter metal recycled: 800
Enter electronic waste recycled: 500

Output

CO2 - AT3 - Capstone Project Review - 1
